How to Measure for porch windows

Equal Leg Side Slider model 1100/1122

"A" is opening width minus 1/4"

"B" is opening height minus 1/8"

Side Slider with 1" installation flange model 1125

Overlap installation

"A" is opening width plus 1-3/4"

"B" is opening height plus 1-7/8"

Double Hung with 1/2" installation flange model 1327

Overlap installation

"A" is opening width plus 3/4"

"B" is opening height plus 7/8"

(Note with or without sill expander)

All windows are made "tip to tip" (TTT). This means windows are made to the exact measurement provided this is from the tip of the installation flange to the tip of the installation flange (tip to tip)

with 1" Installation Flange

FEATURES

- Nylon sash rollers for easy operation
- Fully weatherstripped 2 track frame.
- Continuous meeting rail interlock with weatherstrip - eliminates sash rattle and minimizes air infiltration.
- Aluminum screen wire - standard
- Double strength glass - standard
- Large selection of models and configurations.

BENEFITS

- Convert a screen porch to a three season room.
- Protect porch furniture from the elements.
- Energy cost savings for the Winter and the Summer.
- Sash and screen that are easily removed from the inside for cleaning.
- Reduced outside noise

QUALITY CONSTRUCTION - LONG SERVICE LIFE

- Heavy duty powder coat paint finish.
- Fully weatherstripped frame - improves the insulation of existing windows
- Nominal .050" thick walls of 6063-T6 extruded aluminum for durability.

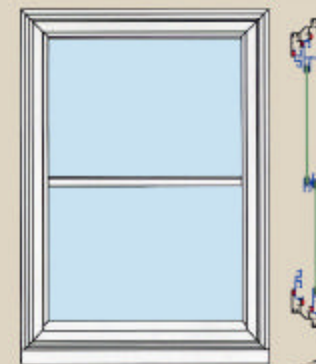

Minimum - Maximum Chart

Size	Minimum		Maximum		Maximum U.I.
	W	H	W	H	
2 lite slider	20	14	84	66	140
3 lite slider	38	14	96	66	162

WHEN THE OPENINGS ARE TALLER THAN WIDER ITS TIME FOR A DOUBLE HUNG.
